

Trouble walking? Unsteady gait? Looking for improvement?

The GaitAid Virtual Walker Is Helping Many People With Movement Disorders Walk Normally Again

**From MediGait LTD, a world leader for innovative technology to restore normal walking—
and living**

Easy to use and affordable, GaitAid:

- ***Is a tested and clinically proven device*** worn for practice-walking just 20-30 minutes a day.
- ***Works 2 ways: during use and afterwards.*** With continued GaitAid practice walking, the brain creates new nerve circuits that support normal walking without wearing the device.
- ***Gets results.*** Using the GaitAid Virtual Walker for only 20-30 minutes a day, people with Parkinson's Disease, Multiple Sclerosis, Cerebral Palsy, Stroke, Gait Problems due to Aging, and other movement disorders regain better balance and normal walking—*often from the first step.*

"I have not seen my sister take a normal step without shuffling in years! I started to cry with joy." *Susan Williams, Craryville, NY (Her sister Sandy is 70 and has had Parkinson's Disease for about 10 years.)*

"I noticed a change in his walking in the very first session. After 10 or 15 minutes, I've never seen him walk like that since he got Parkinson's Disease. He has MS, too, so it's even harder." *Margarita Friedman, wife of patient with Parkinson's Disease and Multiple Sclerosis*

- **GaitAid is quick and easy to order (see below).**
- **GaitAid is available without a prescription.**
- **GaitAid is easy to use at home and requires no special training or supervision.**
